

Stem Summer Camp: Python

Temperature Converter

Purpose: After completing this assignment, you will be able to:

- Make use of Python input commands
- Demonstrate how to utilize Python arithmetic statements in a program

Task: Write a program that asks the user to enter a Fahrenheit temperature and outputs the Celsius equivalent.

Discussion: The program must run as follows:

```
$ python tempConvert.py
Enter a Fahrenheit temperature: 110
110F is 43C
$
```
